## PROFESSIONAL SUMMARY

- Full Stack Developer & QA Analyst with 3+ years of experience delivering secure, scalable, and high-performance web applications in Agile and CI/CD-driven environments.
- Building client- and server-side architectures using React, TypeScript, Node.js, and .NET, with strong database expertise in PostgreSQL, MongoDB, and SQL Server.
- Deploying and maintaining applications on AWS and Azure, and designing robust RESTful and GraphQL APIs.
- Applying Test-Driven Development (TDD) to ensure maintainable codebases and leading QA processes including manual testing, API validation, and automation with Playwright.
- Collaborating with cross-functional teams to deliver impactful digital solutions, focusing on clean code, data modeling, and intuitive UX designs for dashboards and complex workflows.

## TECHNICAL SKILLS

|              |                                                                                                                                                                                                          |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Frontend     | : React.js, HTML5, CSS, JavaScript, TypeScript, Redux, Bootstrap, Java, Kotlin, UI/UX                                                                                                                    |
| Backend      | : Node.js, C#, REST APIs, API Integration, .NET, Google APIs                                                                                                                                             |
| Databases    | : PostgreSQL, MongoDB, SQL Server, MySQL                                                                                                                                                                 |
| Cloud/DevOps | : AWS, Azure, Docker, CI/CD Pipelines, Netlify, Vercel                                                                                                                                                   |
| Tools        | : JIRA, GitHub, Postman, Asana, TFVC, Kubernetes, Visual Studio Code, Selenium                                                                                                                           |
| Practices    | : Testing, Debugging, Agile Development, Documentation, Retrospectives, Production Support, Algorithms, Data Structures, Software Design Patterns, Sprint Planning, Code Reviews, SDLC, QA Methodologies |
| Soft Skills  | : Problem-Solving, Team Collaboration, Time Management, Adaptability, Communication, Attention to Detail                                                                                                 |

## EXPERIENCE

Full Stack Developer – VerifyWise (BlueWave Labs)

Aug 2025 – Present

Remote, Canada

- Lead full-stack development for **VerifyWise** (verifywise.ai), an AI-powered verification platform, using **TypeScript (Node.js)** for backend services and **React.js** for dynamic user interfaces.
- Integrate third-party verification APIs, optimize database queries, and apply security best practices for identity compliance workflows.
- Collaborate in Agile sprints with designers, product managers, and QA to deliver high-quality releases via Azure DevOps CI/CD pipelines.

Professional Development & Freelance Work

Nov 2024 – Jul 2025

Remote, Canada

- Create a professional developer portfolio, earn certifications in **C#** and **TypeScript**, and build a responsive construction company website for a freelance client.
- Develop secure full-stack applications using **Node.js, React, TypeScript** deploying via AWS and Docker.
- Apply **TDD** and contribute to CI/CD pipelines in freelance and open-source projects to ensure maintainable, high-quality releases.

## Full Stack Developer / QA Analyst – Encubate Tech Pvt Ltd (FlexC)

Oct 2021 – Nov 2024

Remote, India

- Develop and launch key features for FlexC’s recruitment platform (flexc.work/octo) using **ReactJS**, **Node.js**, **MongoDB**, and .NET microservices.
- Design and secure RESTful APIs, focusing on authentication, data validation, and scalability.
- Lead QA efforts including manual testing, API validation (**Postman**), and automation with **Playwright**, improving release quality and reducing post-deployment bugs by 30%.
- Collaborate in Agile sprints, write functional documentation, and participate in UAT-to-production deployments.

## Full Stack Developer – John Finch Computers Ltd (UK)

Contract via FlexC

- Deliver enterprise web applications using **.NET**, **JavaScript**, **SQL Server**, optimizing system performance for 2K+ users.
- Build and enhance secure APIs, resolve complex data inconsistencies, and implement scalable backend logic.

## Full Stack Developer – Inforica (Canada)

Contract via FlexC

- Deliver cloud-based solutions using **.NET**, **Azure Functions**, **MongoDB** with a focus on performance and security.
- Assist in compliance-driven development to meet Canadian privacy and data protection regulations.

## PROJECTS

---

### Portfolio Website

2024

*React, JavaScript, Tailwind CSS — tech-swalehas-projects.vercel.app*

- Designed and tested a personal portfolio to showcase full stack and QA-related projects.

### Constructify Web App

2023

*React, Node.js, MongoDB — constructifydev.netlify.app*

- Built and QA-tested a construction dashboard with user authentication and CRUD functionality.

## EDUCATION

---

**Graphic Era University**

**B.Tech Computer Science**

Dehradun, India

2017 – 2021

## HONORS AND AWARDS

---

- **State Topper in High School** — Honored by the Governor of Uttarakhand, **Dr. Krishna Kant Paul**, for securing the highest marks in the state.
